

Selfdrilling fastener with torx 6316SD-TX

Material: galvanized steel
Unit: 1000 pc
Packing: 2000 pc
Weight: 6,66 kg/1000 pc
Thread: Ø 6,25 mm
Length: 16 mm

Description:

Self-drilling screw with pan head. The head has a T30 Torx hole and a serrated bottom. Serrations improve screw fixation, and Torx improves torque. Used in residential and industrial garage doors to attach reinforcing profiles and hinges to the panel.
