

Selfdrilling fastener with torx 6325SD-TX

Material: galvanized steel

Unit: 1000 pc

Packing: 2000 pc

Thread: Ø 6,25 mm

Length: 25 mm

Weight: 6,66 kg/1000 pc

Description:

Self-drilling screw with pan head. The head has a T30 Torx hole and a serrated bottom. Serrations improve screw fixation, and Torx improves torque. Used in residential and industrial garage doors to attach reinforcing profiles and hinges to the panel.
