

Selfdrilling fastener with torx 6316SD-TX-9016 white

Material: galvanized steel RAL9016

Unit: 1000 pc

Packing: 2000 pc

Thread: Ø 6,25 mm

Length: 16 mm

Weight: 6,66 kg/1000 pc

Description: Self-drilling screw with a pan head. The head has a T30 Torx hole and a serrated underside. The serrations improve screw retention, while the Torx improves torque. Used in residential and industrial doors to attach reinforcing profiles and hinges to the panel.
